

## Be Safe Around Trains

### 1. Stay Alert

Look both ways before crossing the tracks. Trains may come from either direction at any time. Take off your headphones. Put down your cell phone. Pay attention.

### 2. Stop for Red Lights

Flashing red lights mean a train is coming. Never walk around lowered crossing gates. DO NOT cross the tracks until the lights have stopped flashing and it's safe to do so.

### 3. Don't Take Shortcuts

The ONLY safe place to cross railroad tracks is at a designated pedestrian crossing. Look for railroad crossing signs or a gate to know where it's safe to cross.

### 4. Tracks are for Trains – NOT Games

Never walk, play, or take pictures on the tracks. Stay a safe distance away. Don't trespass on the railroad right of way.

**It takes a mile to stop a train.**
